- Figma
- Great with team work
- Good communication skills
- Artefact Design
- Report Writing

Language

English (Fluent)

Nepali (Native Speaker)

Hindi (Very good at command)

Education

University of Wolverhampton

Bcs (Hons) Computer Science
2022 - 2025

Deerwalk Sifal School

Science with Computer Science
2020-2022

Experience

Built a Clothing Website with MERN

2024 - 2025

The project highlights the development of a full-stack web application for an online clothing store. It implements a lot of features such as user authentication, secure payment processing with reputable sources such as eSewa.

It also has exchange items features along side with product management to manage the products in the store. All these features helped to provide smooth and easy shopping experience to the user. The project was designed to be scalable, user friendly and caters to both customers and administrators.

Business Analyst for building Bus Ticket Booking System

2023 - 2024

Helped in creating a Bus Ticket booking system. Created all the Workflows and Artifacts for the development process. Tested for bugs and communicated well with the team on resolving them. Maintained a consistent Jira profile and handed out tasks on time for all the team members.

Built a Course Management System using Java

2023 - 2024

Designed and developed a desktop application based on Java Swing for interactive GUI and JDBC to connect to databases in an easy manner. The system offered the facility of easy update of courses, registration of students, and record keeping. Integrated major features of creating courses, registering a student, and validating data, with real-time update in a MySQL/Oracle database. Targeted usability, error handling, and data consistency for easy user experience and reliable performance.
